SPECIFICATIONS.

The Head—Is five and one-half inches high and eight and one-half inches long, inside measurement. This is as high as any family machine made, and must not be confounded with the medium or so-called high-arm machines. The head plate sets into or level with the table.
The Needle—Is straight, self-acting, flat on one side and cannot be set wrong.
The Shuttle—Is open on the end, cylinder-shaped and absolutely self-threading.
The Bearings—Are all steel, well fitted and adjustable.
Self-threading—The machine is self-threading, and no hole to put the thread through, except the eye of the needle.
The Feed—Is positive in action, and has no springs to get out of order.
Automatic Bobbin Winder—Will wind the bobbin as smooth as on a spool of thread.
The Stitch—Is double lock stitch. The same on both sides and will not unravel. Can be lengthened or shortened from eight to thirty stitches to the inch.
The Hand Wheel—Is nickel plated and has a loose wheel attached to operate bobbin-winder without running machine.
The Movement—Is the celebrated eccentric movements, positive in action and fewer working parts than any machine on the market.
The Stand—Has large balance wheel, hangs on two adjustable centers. The treadle is large and hangs in cone centers and all lost motion can be taken up, asters under each end, and can be easily moved. A nice dress guard over wheel to keep dress from getting on wheel.

Attaché ends—Are the famous Johnson's set, in a tin box, and consists of tucker, ruffler, four hemmers, binder, quilter, foot hemmer and feller, under brailer and shearer, oil can and oil, two screw drivers, six bobbins, paper of needles, thumb screw, gauge, and book of directions.
